Panaya CloudQuality™ Suite for SAP SCM

Take Your SAP SCM to Real-Time in No Time with **Zero Risk**

Organizations that want to stay relevant during this time of digital disruption must ensure their supply chain management systems offer real time, responsive and customer centric processes and analytics. For many SAP users this means upgrading both their ERP and SCM to the latest matching EHP version to take advantage of the new business innovation, functionality and performance gains that SAP has to offer.

IT departments entering an **SCM upgrade** are faced with many **challenges** that can delay a change project.
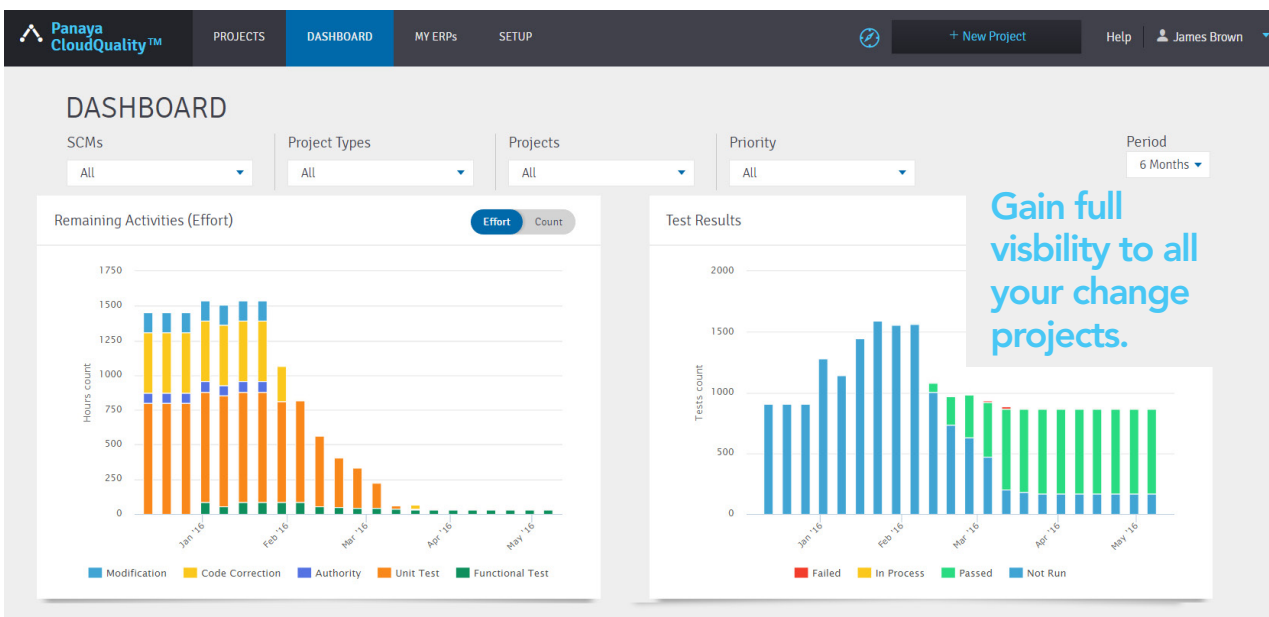

- Unidentifiable timing and cost of project
- Lack of business involvement and support
- Disruptions and failures discovered too late or even post go-live
- Inefficient monitoring practices for test progress and quality

Panaya Accelerates Change and Reduces Project Time

With Panaya, organizations can easily scope a change, alleviate the challenges, and accelerate the project, all while reducing cost and minimizing risk with:

✓ Increased control and visibility with insights into what will break, how to fix it and what to test before the upgrade

✓ Greater efficiency with the cleansing of unused customer code

✓ Simple onboarding with automatic migration of existing testing scenarios

✓ Streamlined processes between testers with automatic updates and documentation of test run evidence

33% of Panaya customers with SCM 7 enhancements have already moved to the latest EHP.

Gain full visbility to all your change projects.

Panaya analysis shows 60% of SAP customers perform EHP/SPS changes on their SCM annually.

Leverage Panaya CloudQuality™ Suite with automated planning and execution of SCM upgrades.

Panaya CloudQuality™ Suite is tailored to the SCM environment so that customers can better plan their SCM upgrade with impact analysis and testing capabilities.

Upgrade your SAP SCM with:

Panaya Impact Analysis

Predicts the full impact of change, provides automated code corrections for errors detected, pinpoints precise test scope and more.
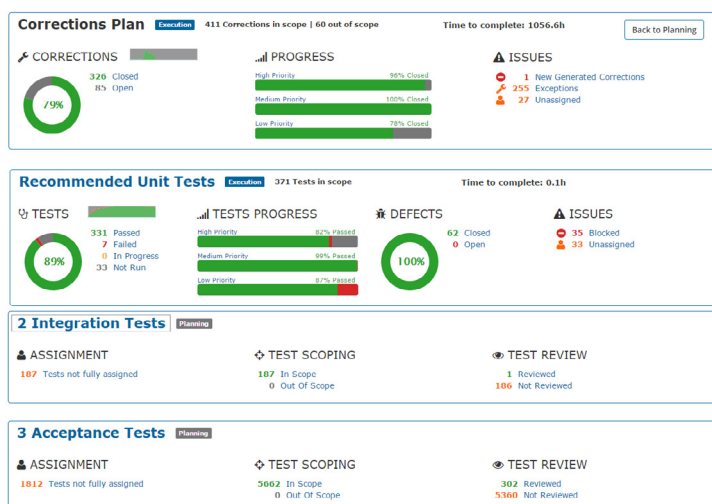

Panaya Test Center

Reduces the numbers - more than 50% of project timelines and budget - spent around testing activities with a comprehensive, yet simple way to perform test cycles faster.

Impact Analysis features:

- Identifies precise test scope
- Reports fixes before changes are made
- Automatic code corrections suggested

Test Center features:

- Automatic migration of your existing test scenarios means easy on-boarding
- Smart dashboard - down to the test step - brings increased control and visibility
- Automatically generates detailed test scenarios while performing a test cycle
- Automatically document test run evidence
- Automatically pass the baton between testers and reduce idle time
- Defect reporting allows developers to immediately start working on the solution
- Specifically designed as an intuitive tool for both IT and business, enabling rapid and wide adoption

Reduce SCM Upgrade
effort & risk by
50%
with Zero Defects
